Re: American Hiking Society Statement in Support of H.R. 6510

Dear Chairman Bishop, Ranking Member Grijalva, and Members of the Committee,

On behalf of the American Hiking Society, our members, supporters, and the hiking community nationwide, we encourage the committee to support H.R. 6510, the Restore Our Parks and Public Lands Act.

All Public Lands Must Be Included in Deferred Maintenance Legislation (incl. U.S. Forest Service)

H.R. 6510 is a first step to address the \$21.5 billion maintenance backlog that exists across all federal lands.¹ The bill creates a fund that would provide \$6.5 billion over five years from energy development revenues on federal land and water to address the most pressing deferred maintenance needs within the National Park Service, Fish and Wildlife Service, Bureau of Land Management, and Bureau of Indian Education.²

However, somewhat perplexingly, H.R. 6510 does not include the U.S. Forest Service and its 193 million acres of public lands, encompassing 157,000 miles of trails. We urge the committee to rectify this oversight prior to final passage.

Current Deferred Maintenance Trail Backlogs

When annual maintenance needs go unaddressed, long-term problems arise, impacting the public's ability to access outdoor recreation. Closed trails, out-of-service restrooms, campgrounds in poor conditions, and impassable roads are only a few of the barriers that hikers face.

Currently 193,500 miles of trails on federal lands need \$1.71 billion of estimated maintenance.

¹ See *Exploring Innovative Solutions to Reduce the Department of the Interior's Maintenance Backlog Before the H. Comm on Natural Resources*, 115th Cong. (2018) (statement of U.S. Dep't of the Interior), available at <https://www.doi.gov/ocl/doi-maintenance-backlog>; See also U.S. Dep't of Agric., Office of Inspector Gen., *Forest Service Deferred Maintenance 2* (May 2017), available at <https://www.usda.gov/oig/webdocs/08601-0004-31.pdf>.

² This funding includes funds from Outer Continental Shelf (OCS) revenue, which also provides funding for the Land and Water Conservation Fund (LWCF).

Agency	Trails	Deferred Maintenance Amount
Forest Service ³	157,000 miles	\$300 million (trails)
National Park Service ⁴	18,844 miles	\$462 million (trails)
Fish & Wildlife Service ⁵	2,100 miles	\$336 million (roads, trails, bridges) ⁶
Bureau of Land Management ⁷	13, 468 miles	\$615 million (roads, trails, bridges) ⁸
All Agencies	(191,412 miles trail specific)	\$1.713 billion

Deferred Maintenance Impacts Economic Activity and Recreation Access

The economic impact of trails and the potential increased economic activity from addressing deferred maintenance needs would be significant. According to the Outdoor Industry Association, recreation on trails in America accounted for \$201 billion in annual spending in 2017 and were responsible for 1.7 million jobs. Much of this spending takes place in small communities along each of the trails, communities for which this income is substantial, meaningful, and will remain local. Many of the jobs trails create cannot be exported offshore: guides and outfitters, hotel staff and restaurateurs, and numerous others directly benefit the community in which they reside. Open and well-maintained trails are essential for this continued economic benefit.

Trails are more than just an economic engine. Since our nation’s founding, the outdoors has been a distinctive part of our American heritage, and trails are integral to that. Whether it’s a family out for a hike on a nearby trail, a returning veteran walking off the war, or hunters and anglers accessing their sites, Americans continue to seek places for outdoor recreation, a connection to nature, and healthy exercise. By addressing long

overdue improvements to trails and the surrounding infrastructure, Congress can ensure that outdoor recreation remains open and accessible.

Land and Water Conservation Fund and Deferred Maintenance Must Be Addressed Together

Additionally, we urge concurrent consideration of legislation to permanently reauthorize and fund the LWCF. As both funds would receive funding from Outer Continental Shelf (OCS) revenue, longstanding commitments to the LWCF should be met before designating new OCS commitments. Fulfilling the promise of LWCF and addressing deferred maintenance are complementary funds to ensure that our natural resources are both conserved and preserved for continued use. One should not be done at the expense of the other.
